- Management and Coordination Skill

Experience

IT Beam

Lahore - Pakistan

2023 - Present

Throughout my tenure, I have demonstrated proficiency in Laravel development, successfully executing numerous projects with a primary focus on product handling and module development. My track record reflects consistent delivery of high-quality work within stringent deadlines.

Contour Software

Lahore - Pakistan

Jan 2023 - April 2023

Throughout my internship, I've refined my proficiency across a spectrum of technologies, encompassing Java, HTML, CSS, JavaScript, React, Node.js, Express.js, and MongoDB. I've leveraged these competencies to engineer an array of software applications, with a strong emphasis on web development and enterprise solutions. My specialized expertise lies in HTML, CSS, JavaScript, React, Node.js, Express.js, and MongoDB.

Education

The University of Lahore

Masters in Computer Science

2023

Coursework: Mobile Application Development, Web Programming, Information and Network Security, and Machine Learning

Central Group Of Colleges, Lahore

I.,Cs

Final Year Project

Visual Recognition and Sensing of Human(VRASH)

- VRASH, our AI-based attendance system, eliminates the need for physical check-ins.
- Automatically records attendance by capturing video when individuals enter and exit the class.
- Algorithm accurately identifies attendees, timestamps their entry and exit, and calculates total class duration seamlessly.
